

## Technology & Automation Vendors

### What is UnitVisID?

UnitVisID is a guideline maximizing the full potential of RFID for medications dispensed in hospital and healthcare organization pharmacies.

Our goal is to ensure the interoperability, performance, and reliability of RFID-tagged medications as they move through the supply chain — from manufacturing to pharmacies and ultimately to patient administration — while interacting with systems and software along the way to solve pharmacy issues and create better patient outcomes.

UnitVisID Certified products rely on existing standards like RAIN and GS1, and have been tested to ensure:

#### Interoperability

Every medication and its unique attributes are read by all UnitVisID Certified hardware devices

#### Performance

Use of only the best RFID inlay for the size, shape, material, and application environments

#### Reliability

Certified products are independently tested and qualitatively proven in challenging healthcare applications

### Benefits of UnitVisID Certified Solutions

#### 3rd Party Testing

Access to 3rd party testing facilities and robust testing procedures for newly developed automation hardware.

#### Automating Manual Workflows

Gain functionality with existing non-RFID systems to improve customer efficiencies and overall client satisfaction.

#### Quality Assurance

A rigorous quality system in place aimed at validating a minimum of 99.6% of finished products contain properly encoded product information.

### UnitVisID Alliance Membership

UnitVisID Alliance is open to any organization interested in supporting our mission to encourage the adoption of RFID technology to alleviate pain points in healthcare workflows. Current members include RFID companies, pharmaceutical manufacturers, 503B outsourcing facilities, inlay manufacturers, label converters, and service suppliers. Most importantly, a continually growing number of hospitals and healthcare organizations are actively involved in the Alliance.

**Become a member now** and achieve greater production efficiencies for your products while collaborating with leaders from across the healthcare industry developing cutting-edge practices leveraging RFID to drive pharmacy workflow improvements.
